FREE GUIDE · SUMMER PROJECT COLLECTION

Lose weight without fighting food

The smart plate + anti-anxiety protocol + week 1

A simple way to organize diet, training, and anxiety for 7 days — no crash diet, no guilt.

What you'll get

The smart plate, the P.A.U.S.E. protocol, and all of week 1 of the plan.

No extremes

Method for diet, training, and anxiety — no weight promises, no guilt.

FREE NEXTLEVEL GUIDE · SAMPLE OF THE FULL GUIDE

Before you start

This guide is educational and meant to help you better organize your routine — it doesn't replace professional guidance.

Read before using

This material does not replace a consultation with a doctor, dietitian, psychologist, or fitness professional. If you are under 18, pregnant, have a clinical condition, or a history of an eating disorder, use it only with professional support.

- The goal isn't to suffer more for less time — it's to build a routine you can repeat.
- A meal outside the plan doesn't erase progress; what matters is the next choice.
- If you have any health or safety question, the decision should be professional.

The smart plate

A simple way to build complete meals without counting calories — half vegetables, a quarter protein, a quarter carbs.

Protein (1/4)

Eggs, chicken, fish, lean meat, yogurt, tofu, beans.

Carbs (1/4)

Rice, potato, cassava, oats, fruit, whole-grain bread.

Vegetables (1/2)

Greens, vegetables, salads, and colorful preparations.

• Without demonizing carbs

The problem is usually portion, frequency, and lack of planning — not carbs themselves.

The 10-minute P.A.U.S.E. protocol

Use this when the urge to eat out of anxiety, boredom, or stress hits.

- P. Pause — before eating on impulse, sit down and put the food down.
- A. Air and body — breathe in for 4 seconds, out for 6, for 2 minutes.
- U. Use HALT — am I hungry, angry, lonely, tired, or anxious?
- S. Substitute an action — shower, short walk, message, journaling.
- E. Enact a choice — if you still want to eat, serve a portion and eat without a screen.

Week 1 · Foundation — complete and ready to use

Check off each completed task — small daily actions build the habit.

- ☐ Day 1 — Diagnosis: measure your current routine, sleep, hunger, triggers, and groceries.
- ☐ Day 2 — Smart plate: build 2 meals with protein + vegetables.
- ☐ Day 3 — Training: light strength or a walk if sedentary.
- ☐ Day 4 — Environment: organize the fridge and snacks.
- ☐ Day 5 — Anxiety: try the PAUSE protocol once.
- ☐ Day 6 — Cardio: 25-30 min moderate walk.
- ☐ Day 7 — Review: guilt-free checklist and adjustments.

• Goal of the week

Diagnose your routine and take the first steps without rushing — the other 3 weeks (consistency, quality, and fine-tuning) are in the full guide.

Ready for the full guide?

That was just Week 1. The full **Smart Weight Loss** guide gives you: a 14-day menu, shopping list, practical recipes, A/B/C strength workouts, the complete protocol against emotional hunger, the sleep and environment module, all 4 weeks of the 30-day plan, and the execution notebook.

To be transparent: results depend on your routine and consistency. That's why the focus is method and organization, not a weight promise.
