GETTING STARTED

The rule of 4 elements for a good prompt

The difference between a generic answer and a professional one lies in what you share before you ask. Always use these 4 elements:

Context
Situation, audience, goal, and constraints.

Format
Table, email, plan, checklist, or summary.

Criteria
Tone, length, sources, and what to avoid.

Review
Ask for improvements and error checking.

CORE IDEA
AI does not replace human judgment. It multiplies the capacity of those who know how to ask, evaluate, and apply.

WHICH AI TO USE

A snapshot of the tool map

Activity	Recommended AI
Text and ideas	ChatGPT or Claude
Current research with sources	Perplexity
Your own documents and PDFs	NotebookLM
Simple design and posts	Canva AI
Microsoft Office	Copilot

IN THE COMPLETE GUIDE

The full map covers 16 tools — including Midjourney, Adobe Firefly, Runway, ElevenLabs, GitHub Copilot, and more.

PROMPT METHOD

The universal prompt model

COPY AND ADAPT

"You are [role/expert]. My goal is [outcome]. The audience is [audience]. Deliver it in [format], with [tone] tone.
Respect: [constraints]."

- ✓

Rewrite it in simpler language.
- ✓

Turn it into a comparison table.
- ✓

List risks, exceptions, and cautions.

COMPLETE GUIDE

What you'll find in the full version

- ☒ A detailed profile of the 16 leading AI tools (best use, when to avoid, starter prompt).
- ☒ Ready-made prompts for text, research, documents, spreadsheets, presentations, marketing, image, video, and code.
- ☒ Applications by professional profile — student, entrepreneur, marketing, sales, finance, and more.
- ☒ Precautions on privacy, copyright, and responsible use.
- ☒ 7-day implementation plan and a maturity checklist.
- ☒ A complete workbook to build your personal tool and prompt map.

The advantage comes from **practice**.

This was just a snapshot. The complete guide has 40 pages with the map of the 16 leading AIs, ready-made prompts by activity, and a 7-day implementation plan.
