Before You Start

This guide is educational and helps you better organize your eating — it doesn't replace professional guidance.

Read before using

This material does not replace consultation with a dietitian, doctor, or licensed professional. People with diabetes, kidney disease, eating disorders, allergies, pregnant people, or any clinical condition should adapt this content with professional guidance.

- The goal isn't perfection — it's predictability, organization, and consistency.
- Swap foods for equivalents; the best plan is the one you can actually repeat.
- If there's a health or safety question, the decision should be professional.

The plate method

A visual method to build balanced plates without a scale, an app, or complex math.

Element	How to visualize it	Examples
Vegetables	1/2 of the plate	salad, broccoli, zucchini, carrot, cucumber
Protein	1/4 of the plate or 1 palm	chicken, eggs, fish, tofu, beans + rice
Carbohydrate	1/4 of the plate or 1 fist	rice, potato, cassava, oats, fruit
Fats	1 thumb or a small portion	olive oil, avocado, nuts, seeds

• What actually matters

You don't need a perfect diet. You need a simple structure that reduces doubt when it's time to build your plate.
