SAMPLE

The 6A System to apply AI in your business

Attract, Present, Assist, Argue, Administer, and Analyze — six areas where AI creates fast impact in your business.

AREA	GOAL
Attract	Generate attention and traffic.
Present	Show value clearly.
Assist	Respond fast and consistently.
Argue	Sell with more consistency.

How to choose where to start

TIP

Start with the area where the business loses the most money or time. For many small businesses, the best starting points are WhatsApp customer service, social media content and sales proposals.

Level 1

One-off use — a single caption, an isolated email.

Level 2

Recurring use — saved prompts and templates.

Level 3

Process — clear service and content workflows.

Level 4

Automation — connected tools with human oversight.

A ready-made workflow to try today

A standard WhatsApp service flow

Goal: respond faster and with consistency.

Tools: ChatGPT, Claude, WhatsApp Business.

READY-TO-USE PROMPT

"Create a WhatsApp service FAQ based on this business: [describe]. Include replies about hours, price, payment, deadline, location, warranty, scheduling, delivery and frequent questions. Tone: friendly, objective and professional."
